

SIKA AT WORK

PODOL MALL (Kyiv, UKRAINE)

Sika Technologies: Sikafloor® car park flooring

Sikaplan® roof waterproofing

BUILDING TRUST

PODOL MALL

PROJECT DESCRIPTION:

The Podol Mall has been conceived as a classical 3 level shopping and leisure centre suitable for providing a variety of quality goods and full range of services to its attendees. It is worth noting that the Mall complies with major rules and principles accepted in the industry with a special focus on merchandising, logistics, anchor tenants, public access sites and their proportions. The double entrance design ensures the facility round- the- clock operations. The project also accounts for major anchoring functions, such as grocery store, household goods store, fashion-oriented stores, center for kids, movie theatre, food court.

The only, shopping mall in Ukraine, the construction of which is carried out in accordance with the requirements of the DGNB building environmental performance assessment systems.

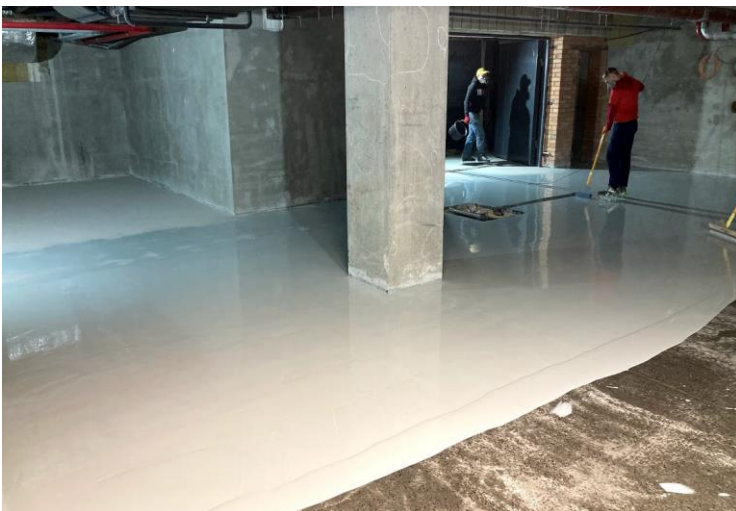

REQUIREMENTS FOR PROJECT:

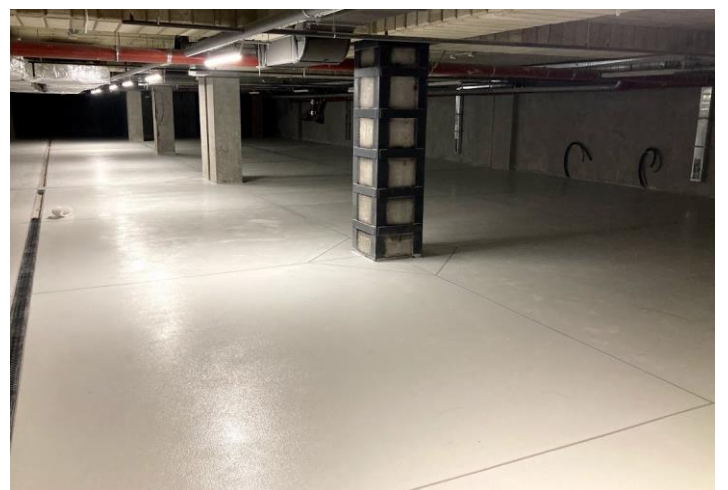

The floor coating must protect concrete structure from deicing salts, withstand a heavy wear of wheels and provide good cleaning ability.

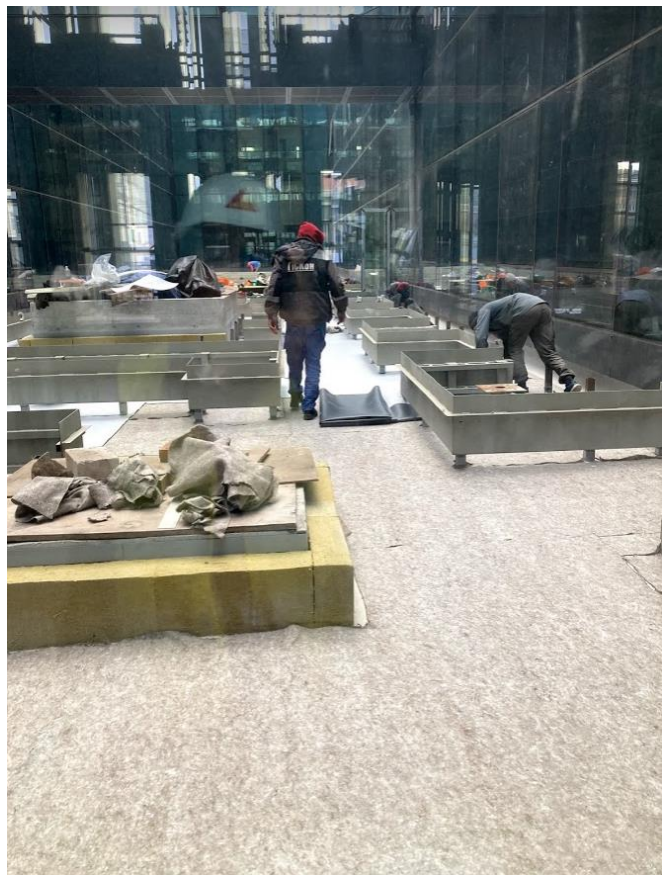

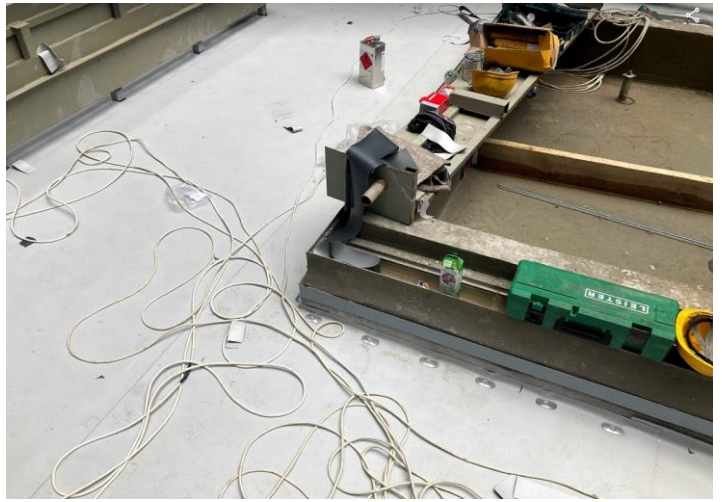

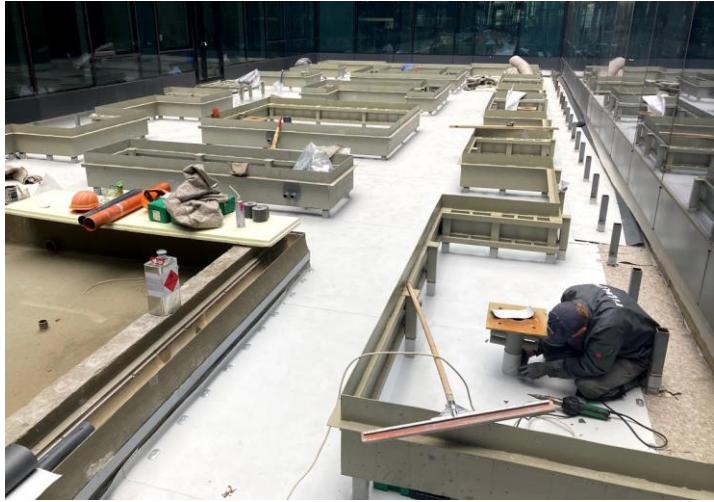

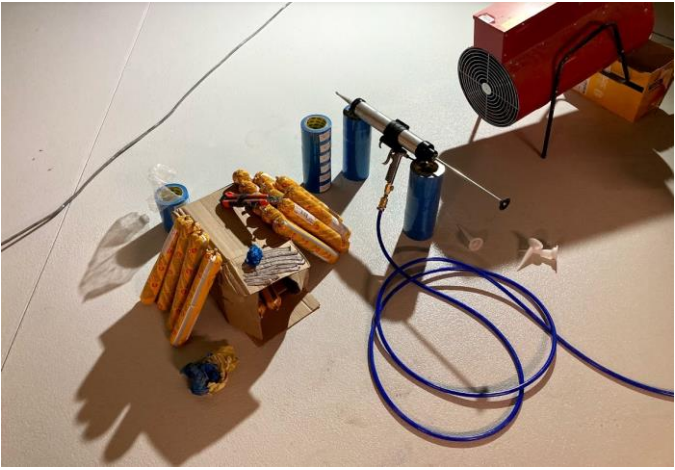

OPTIONAL SOLUTIONS FROM SIKA:

Systems of materials for facade structural glazing.

Basement waterproofing
